

New supplier

www.ttaf.com.tr

TTAF is a leading company that is specialized at interconnect products & cable assembly production. As a result of 20 long years experience in electronic components; automation based cable assembly production activities got started within our factory located at 6000sqm closed area in Buyukcekmece, Istanbul. In parallel with production, import and sales distribution of electronic components is being prolonged under TTAF organization. During the first years, TTAF focused on consumer electronics sector, but in recent years new targets have been topics of the agenda; fiberoptic, military, medical, retail cable, industrial and otomotiv fields have been the target fields of investments in addition to consumer electronics. In the meantime, our company is so determined on expanding to international market that we have customers in 25 different countries all over Europe and Middle-East and we will improve it with each passing day.

As a company which does not compromise quality since it was first founded, TTAF performs all activities in accordance with ISO9001:2000, ISO 14001, OHSAS18001,PCT,CE,UL ,ETL & TS-EN 16949 standards approved by the certificates owned. We expect our suppliers to be sensitive on quality as much as we do and apply RoHS compliance tests to all incoming products by RoHS test machine within our own laboratory.

Focusing on customer satisfaction & being solution partner rather than an ordinary supplier are our main principles. In this context; design capability, custom drawing, fast sampling, flexible prices & delivery just in time are privileges for customers of TTAF.

Designing user-oriented cases and tuning knobs

The rapid development of progressive electronification allows a practically inexhaustible variety of different applications. Their efficiency and complexity are equally varied. It is then a question of taking sufficient account of the expectations and capabilities of the users - on the one hand because of their systems of values, on the other hand for easy-to-understand operability. OKW products make a special contribution here thanks to their aesthetic design and their functional approach.

Find out for yourself by ordering the new Enclosures Catalog 2010/2011 on <http://www2.okw.com/OPD-WebSite/contact.okw?locale=en>

Flexible printed circuit (FPC) is not a simple substitute for the wire but has a wide range of functions and uses. In the year of 1992. PRINTEC begun the FPC production with the technical supports from USA and Japan. At PRINTEC we offer a full range of specialized products: single and double sided flexible, multilayer flexible, flex/rigid, and bend-flex circuits. We also offer artwork design and component assembly services for all these products. PRINTEC Quality Philosophy dictates that we not only produce an item that meets the letter of the customers written requirements, but also satisfies all of the customers procurement needs.
