

Variable Height Switches - now also with colourful actuators

The mec 3E fully sealed (IP-67) pushbutton switches are available in various actuator heights. There are 6 standard overall heights from 8.0 to 15.0 mm while customised heights can be provided on customer request. The actuators of the 3E are now available in the colours blue, yellow, red, white, black and are made of polycarbonate (temp. range up to 85°C). The 3E actuators are also available in the black material PPS (temp. range up to 160°C). The 3E switches can be delivered assembled with the actuator or delivered loose to be fitted after soldering. The switch is available in through-hole or surface mount and features a full 1mm key travel, operating force of 3N and ratings from logic level to 50mA/24VDC. Mechanical life exceeds 10 million cycles. <http://www.mec.dk>

Pulse's New Micro-acoustic Speaker Platform Production Line Increases Quality while Reducing Costs and Time-to-Market

PulseEngineering introduces a new mature and proven platform for the design and production of micro-acoustic speakers. Utilizing the same core structure for each product shortens time-to-market, reduces product development costs, reduces the number of parts needed for each new product, and improves quality. With this platform, Pulse can quickly meet market demand for innovative, small, high-performance, price-competitive receivers and loudspeakers. <http://www.pulseeng.com>

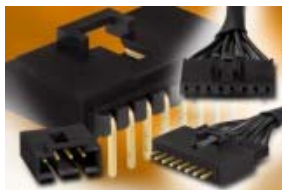

Multicontact-Connectors Micro T

Micro-T male connectors for use in applications requiring small and light weight connectors of high reliability. The D-shape of the insulator assures polarized mating of the connector halves. The connector has a 1,27mm pitch and comes in 9, 15, 21, 25, 31 and 37 poles. Contact termination is solder cup or through-hole straight or right angled PCB mounting. http://www.mpegarry.de/index.php?lang=en&menu=16&id_category=19&id_product=038600

MPE Garry has upgraded his 2,54mm range

With a new series of 2,54mm crimp connectors together with mating pin headers MPE-Garry has completed his extensive range on this product group. All these new parts expand the existing product range in an ideal manner and now provide all imaginable combinations of board to board and wire to board connections. The crimp housings are available as single or double row version with different coding and locking options. The crimp contacts are offered for use with AWG 22 - 26 wires and can be purchased either loose or on reel for automatic assembly. http://www.mpegarry.de/index.php?lang=en&menu=2&id_article=56

INPAQ is a leader in circuit protection components and antenna products for computing, communication, consumer electronics, and automotive electronics.

INPAQ offers a complete line of EMI/EMC solution, Over voltage protection and RF solution that are all designed to make electronic products to work smoothly and effectively. With cutting edge technology, INPAQ has applied 285 intellectual properties. Among them, 125 have been registered.

Check out the Inpaq web-site at <http://www.inpaq.com.tw/en/>
