New Generation of Illuminated Surface Mount Switches from mec

The illumec™ range that allows illumination also in surface mount switches has been extended to include the 4A version. Now all illuminated switches from mec can be delivered for surface mount. The 4A illumec™ switch is a new generation of the well known multimec® 3A switches and can be fitted with the same award winning keycaps and bezels. The keycaps can either be fully illuminated or illuminated by means of lenses in solid colour caps. The illumec™ switches are sealed to IP-67 standards, have a minimum mechanical life of 10 million actuations and a ruggedized construction that accepts 100N force applied to the actuator. illumec™ is available in either through hole or surface mount configurations.

Low cost RF cables for GSM, GPS, W-Lan and Bluetooth applications

Custom RF cables

GradConn now offer you a new range of economical RF cables in both micro coax and RG174 cable. Our focus is on the RF connector types which are most popular in GSM modem and Bluetooth markets. All RF cables are 100% quality tested for conductivity before they leave our ISO9001:2000 factory in Taiwan. We offer a variety of interface connectors the most popular in the wireless market place being SMA jack (female) or FME plug (male). We also offer MCX, MMCX and reverse polarity (RP) versions and can also offer a variety of cable diameters in the Micro-Coax cable.

Wall cases from OKW

OKW has extended the "DIATEC" range of wall mounting enclosures with two new models moulded in lava (dark grey) ABS. The new models are particularly suitable for wall or machine mounted applications for example machine controllers, door entry systems, time loggers, detections systems, communications devices, and medical equipment. 'DIATEC' cases have a modern contoured design with a central control panel for mounting a membrane keypad, display module or push-button switches. The cases are also available with hinged lids to protect this area. The 'DIATEC' range has external dimensions of 210 x 200 x 48 mm (size S) and 270 x 200 x 48 mm (size M). The central control panel is recessed by 2.5 mm and has dimensions of 120 x 128 mm or 180 x 128 mm respectively.

Din «Design-in»-partner for elektromekaniske løsninger.

I mer enn 20 år har vi designet og levert kundetilpassede løsninger til norske og internasjonale kunder. Dette har etter hvert blitt en større og større del av vår omsetning og er på mange måter blitt vår «Hoved-Meny». Vi har lang og solid erfaring i å jobbe tett med kunder, deres utviklingsavdelinger og prosjektingeniører og har levert spesialdesign fra den helt enkle, lille kabelen til de store og meget komplekse løsninger. Dette gjelder ikke bare kontakter og kabler, men også andre elektromekaniske produkter.

Kontakt oss og vi hjelper deg i forhold til ditt behov til en riktig pris.
